Possible economic uses of felled wood are: having wood planed by a portable wood miller into usable boards, selling marketable burls, or cutting into firewood. - Provide a description of the proposed method of tree disposal
- 3. Letter of justification of tree removal. Provide condition of tree and reason why tree removal is requested, photographs showing the condition of the tree(s), damage the tree is causing, and any other information pertinent to the request.
- 4. Once the application has been reviewed, you may be required to provide a certified arborist report. For a list of certified arborists contact the International Society of Arboriculture (http://www.isa-arbor.com).

E. DEFINITION OF TREE AND INDIGENOUS TREE

- 1. "Tree" means any live woody plant rising above the ground with a single stem or trunk of a circumference of forty inches or more for nonindigenous species and eighteen inches or more for indigenous species measured at four and one-half feet vertically above the ground or immediately below the lowest branch, whichever is lower, and having the inherent capacity of naturally producing one main axis continuing to grow more vigorously than the lateral axes. All commercial tree farms, nonindigenous tree species in residential zones and orchards (including individual fruit trees) are exempted from the definition of tree for the purpose of this chapter. Trees of any size within the public right-of-way shall constitute a tree for the purposes of this subsection.
